

Bronchix TINCTURE

COUGH - BRONCHITIS

Eases cough

NPN 80019129

50 ml

Each ml contains					
Marshmallow	fresh root	<i>Althaea officinalis</i>	1:2	187 mg	Organic
Echinacea purpurea	fresh root	<i>Echinacea purpurea</i>	1:2	117 mg	Organic
Echinacea angustifolia	fresh root	<i>Echinacea angustifolia</i>	1:2	27 mg	Organic
Valerian	fresh root	<i>Valeriana officinalis</i>	1:2	27 mg	Organic
Bayberry	fresh bark	<i>Myrica cerifera</i>	1:3	16 mg	Wildcrafted
Licorice	dried root	<i>Glycyrrhiza glabra</i>	1:8	13 mg	Organic
Myrrh	resin	<i>Commiphora myrrha</i>	1:1	1 mg	Organic
Propolis	resin	<i>Apis mellifera</i>	1:5	0.3 mg	Organic
Alcohol 45% to 55%, certified organic					

DOSAGE

INTERVENTION: 0.5-1.5 ml, 1 to 5 times a day, maximum 1 week.

TREATMENT: 1 ml, 3 times a day, for 2 to 6 weeks.

DIRECTIONS FOR USE

Shake tincture before using. For long-term treatment, give 6 days out of 7. Use undiluted to treat infections and all throat problems. To treat inflammation, irritation or cough, dilute in a mouthful of water.

MODE OF ACTION

Bronchix was specifically designed to treat respiratory ailments such as bronchitis and persistent dry cough which exhausts the organism. Its mucilage relieves cough and soothes irritation of the respiratory tract, and it preserves the integrity of the respiratory mucus membrane. Its anti-catarrrhal and expectorant actions help eliminate mucus. As well as its specific action on the respiratory system, this compound is antibacterial and antiviral and supports the functions of the immune system. It is also used to treat sore throats, laryngitis and other ailments which cause irritation, inflammation and pain in the throat.

MARSHMALLOW: the mucilage contained in marshmallow root has emollient properties which reduce irritation and inflammation of the respiratory tract, more specifically in the bronchi. Nutritive and tonic, marshmallow is especially interesting when there is a dry cough. By hydrating the mucus membrane, it reduces the intensity and frequency of coughs caused by irritation of the throat and respiratory tract. It also stimulates phagocytosis.

ECHINACEA: this well-documented herb is essentially antibacterial and antiviral. Its marked action on the immune system makes it an efficient treatment for infections, particularly those of the respiratory system. Recent studies have demonstrated the effect of echinacea on the immune system and now classify it as an immunomodulator, reconsidering the preferred terminology. Studies have also revealed its anti-inflammatory properties, which help it reduce inflammation associated with respiratory problems.

VALERIAN: sedative and antispasmodic, the valerian in this compound soothes coughs by relaxing the smooth muscles of the bronchi, thereby promoting calm and sleep. It is also a pain reliever and anti-inflammatory.

BAYBERRY: stimulates circulation and reduces fever slightly. Its astringent property helps reduce the production of mucus and nasal discharge. It promotes healing of the mucus membranes.

LICORICE: anti-inflammatory and emollient, licorice soothes irritation and inflammation of the respiratory tract. It is also expectorant and antispasmodic, as well as antibacterial and antiviral against some specific pathogens.

MYRRH: this resin has antimicrobial, anti-inflammatory and analgesic actions. Myrrh is also astringent.

PROPOLIS: this resin is highly antibacterial and antiseptic, as well as analgesic, anti-inflammatory, an immune stimulant and a tissue healer.

HELPFUL ASSOCIATIONS

DRASTIX to treat cold and flu.

PULMONA TEA for respiratory tract infections.

SINUSTOP or **CONGESTOP** for the flu, sinusitis or a cold.

PLANTAIN SYRUP, alternating with **BRONCHIX** for cough, irritation, throat infection, bronchitis, laryngitis.

USNEA tincture at the first signs of cold or flu for people prone to respiratory tract infections.

ETHNOBOTANY

Respiratory system: recurring cold and flu, bronchitis, staphylococcus infection, persistent cough, spasmodic cough, excess mucus, sore throat, bad breath, gingivitis, laryngitis, tonsillitis, allergies.

CONTRA-INDICATIONS

Consult a health care practitioner if symptoms persist or worsen. Do not use in case of allergies to beehive products, or the resin of evergreens or poplar.

INTERACTIONS

Avoid taking simultaneously with prescription drugs or immune suppressants.
