

## Infectix TINCTURE

### COLDS & FLU

Respiratory tract infections

NPN 80017668

50 ml

#### Each ml contains

Echinacea angustifolia	fresh root	<i>Echinacea angustifolia</i>	1:2	353 mg	Organic
Echinacea purpurea	fresh root	<i>Echinacea purpurea</i>	1:2	88 mg	Organic
Propolis	resin	<i>Apis mellifera</i>	1:5	5 mg	Organic
Alcohol 36%, certified organic					

#### DOSAGE

**Intervention:** 1.25 ml, 4 to 6 times a day, maximum of 1 week.

**Treatment:** 1.5-2 ml, 2 times a day, maximum of 3 weeks.

#### DIRECTIONS

Dilute tincture in a mouthful of water. Shake before using. When using for a long period, take 6 days out of 7. Use undiluted for all throat problems.

#### MODE OF ACTION

Infectix helps the organism fight infections and increases the body's resistance to pathogens. This compound is antibacterial and antiviral and slows the reproduction of bacteria and viruses. It increases the immune response by activating different immune cells (macrophages, NK cells) which help eliminate pathogens. Its anti-inflammatory effects reduce nasal congestion and sore throats that accompany colds and flu. Analgesic and antiseptic, Infectix helps maintain the health of tissues, thus hindering the propagation of viruses. If used at the first signs of an infection, Infectix will reduce its severity and duration. It is also used for respiratory and ear-nose-throat infections, along with herbs specific to the condition treated.

If the infection becomes virulent, then Drastix is used for its greater antibacterial activity and its specific action on the respiratory tract lining.

Infectix is often used in prevention, to increase the body's resistance to infections and support an immune system weakened by stress, sickness or unhealthy diet. Using Infectix in prevention increases the number of white blood cells in the blood and promotes a healthy immune response. For this, it is used in smaller doses for a maximum of 8 weeks.

The elements of this compound have antifungal properties and it can treat fungus infections, as well as the yeast infection *Candida albicans*. The antioxidant properties of Infectix also protect the organism against free radicals.

**ECHINACEA:** this well-documented herb is mainly antibacterial and antiviral. Its pronounced effect on the immune system make it an obvious choice in the treatment of infections, particularly those of

the respiratory tracts. Recent studies have uncovered its immune-modulating properties which explain the effects of echinacea on the immune system. Studies have also shown that echinacea is anti-inflammatory, reducing the inflammation of respiratory tract infections.

**PROPOLIS:** an antibacterial and antiseptic resin, propolis is very efficient against micro-organisms that cause infections. As an anti-inflammatory and analgesic, it reduces symptoms of colds and flu. It also stimulates immune defenses and supports the actions of other herbs.

#### HELPFUL ASSOCIATIONS

**PULMONA TEA** for cough and respiratory tract infections.

**COLD & FLU TEA** infusion for infections accompanied by fever, muscle and joint pain, fatigue and congestion.

**SINUSTOP** for sinusitis.

**RESIS TEA** infusion for fatigue, muscle and joint pain, at the start of an infection.

**PLANTAIN SYRUP** for cough and irritation of the bronchi.

#### ETHNOBOTANY

**Respiratory system:** cold, flu, bronchitis, cough, sinusitis, runny nose, pharyngitis, laryngitis, sore throat, ear ache, conjunctivitis, recurring infection, viral infection, tonsillitis.

**Urinary system:** urinary infection, prostatitis.

**Oral care (as a gargle):** bad breath, mouth sores, ulcers, abscess.

**External use:** injury, cut, infected wound, insect bite, cold sores, genital herpes, itching, fungus infection, athlete's foot, boils.

#### CONTRA-INDICATIONS

Consult a health care practitioner if symptoms persist. Do not use if allergic to bee products, evergreens or poplar.

#### INTERACTIONS

Consult a health care practitioner if using immune suppressants.
