Mallow	fresh flower	<i>Malva sylvestris</i>	1:5	20 mg	Organic
Black Walnut	fresh root	<i>Juglans nigra</i>	1:4	20 mg	Organic
First cold-pressed organic olive oil ( <i>Olea europea</i> ) and organic bee's wax					

### DOSAGE

#### NEWBORN (UNDER 2 YEARS OLD)

TREATMENT: apply 4 to 6 times per day.

#### ADULT

TREATMENT: apply 4 to 6 times per day.

### DIRECTIONS FOR USE

External use only.

Diaper rash: apply a thin layer on clean, dry skin.

Nipple balm: apply the ointment right after nursing and wash nipples before nursing so that baby does not ingest it.

### MODE OF ACTION

Biobaby salve was specifically conceived for the delicate skin of babies. It is used to soothe, heal and protect the skin. It soothes the irritation and inflammation of diaper rash, reducing the discomfort and burning sensation it causes. Applied after a diaper change, Biobaby salve protects the skin against the irritation of urine and feces. Besides soothing the skin, it speeds healing and regeneration of the tissues.

Biobaby is recommended for irritation and minor problems of the skin such as heat rash, redness, itching and irritation of skin folds (elbows, knees, etc). As an antiseptic, it is used to prevent and treat fungus infections of the skin, such as diaper mycosis.

It is also recommended for nursing mothers. It soothes the pain of irritated or cracked nipples. Biobaby promotes healing of irritated nipples, tightens the tissues and maintains the health of the skin. When treating thrush in the newborn, Biobaby salve is also applied to the nipples to strengthen the treatment and prevent the risk of relapse.

**MARSHMALLOW:** marshmallow root is an emollient. It soothes irritation and inflammation, it hydrates and protects the tissues, it protects the skin and promotes blood circulation.

**CALENDULA:** a vulnerary that promotes the regeneration of tissues and accelerates healing. It acts on the lymph, it is anti-inflammatory as well as antibacterial and antifungal. Calendula is used to treat most skin problems, from irritation to skin injuries to fungal infections.

**PLANTAIN:** reduces inflammation, relieves itching, disinfects the skin and promotes healing of the tissues.

**MALLOW:** it soothes, cools and protects fragile and irritated baby skin. Mallow's anti-inflammatory and astringent actions preserve the health of the skin.

**BLACK WALNUT:** antifungal, black walnut is very efficient to treat skin fungus. It is also astringent and vulnerary.

### HELPFUL ASSOCIATIONS

CHAMOMILE infusion for diaper rash associated with teething.

TEETHING DROPS for teething pain.

NETTLE infusion for the nursing mother.

### ETHNOBOTANY

Integumentary system : diaper rash, cracked nipples, irritation and inflammation of the skin, fungal diaper dermatitis.

### CONTRA-INDICATIONS

Consult a health care practitioner if symptoms persist or worsen. Do not use if allergic to Asteraceae and Plantaginaceae. If hypersensitivity occurs, discontinue use.

### INTERACTIONS

None known.
