Pure vegetable glycerin, certified organic						

DOSAGE

TODDLER UNDER 2 YEARS

In traditional herbalism, the dose for this glycerite is 1 to 3 drops, rubbed on the gums, 2 times per day. Health Canada recommends consulting a health care practitioner before administering to a child under 2 years.

CHILDREN 2-4 YEARS

INTERVENTION: 0.2 ml, 3 to 4 times per day.
TREATMENT: 0.33 ml, 1 to 2 times per day.

CHILDREN 5-9 YEARS

INTERVENTION: 0.25-0.33 ml, 3 to 4 times per day.
TREATMENT: 0.5 ml, 1 to 2 times per day.

DIRECTION FOR USE

Apply undiluted to affected part of the gums, rub in gently. Consult a health care practitioner for internal use.

MODE OF ACTION

Teething Drops is the ally of all teething babies. It has local analgesic properties and reduces pain. The marshmallow in this compound softens the gums in order to ease teething. Marshmallow and plantain calm the inflammation and local irritation of the gums. Teething Drops promotes healing of the tissues and reduces the intensity and duration of the pain.

Teething can cause discomfort in other systems. The nervines and calming herbs of Teething Drops (catnip, chamomile, green oat, valerian) reduce agitation and nervous irritability, calm the child and help him tolerate the pain. Used at bedtime, Teething Drops promotes peaceful and regenerative sleep. Catnip helps reduce slight fever associated with teething. This compound also soothes digestive symptoms such as belly ache and diarrhea.

MARSHMALLOW: the mucilages of marshmallow root are emollient and reduce irritation and inflammation of the mucus membrane of the mouth. By soothing and hydrating the mucus membranes, it reduces their inflammation and associated pain.

CATNIP: an aromatic herb, catnip eases digestion and reduces abdominal discomforts such as abdominal cramps. It is calming, reduces irritability and promotes regenerative sleep. Catnip also reduces fever.

CHAMOMILE: it calms inflammation of the mucus membranes of the mouth and of the entire digestive tract. Chamomile soothes the nervous system and promotes healthy sleep. Moreover, its

bitter principles gently stimulate the secretion of digestive juices, which fosters good digestion.

PLANTAIN: it soothes inflammation and irritation of the mucus membrane of the mouth. Plantain protects mucus membranes and promotes their healing.

GREEN OATSTRAW: as a nourishing herb, green oat normalizes the functions of the nervous system, calms and reduces irritability. It is indicated in all conditions where the nervous system needs support.

VALERIAN: sedative, the valerian in this compound soothes the nervous system, reduces agitation and promotes sleep. It is also analgesic and anti-inflammatory.

HELPFUL ASSOCIATIONS

LULLABY to promote sleep during teething.

CHAMOMILE infusion for agitation, irritability and irritation of the digestive system.

PLANTAIN SYRUP to expectorate mucus lodged in the respiratory tract.

COLIC for digestive cramps and diarrhea.

SLIPPERY ELM infusion for inflammation of the mucus membrane of the mouth and digestive tract.

ETHNOBOTANY

Teeth and mouth: teething pain, inflammation of the mucus membrane of the mouth, gingivitis.

Nervous system: irritability, nervousness, agitation, sleep disturbances due to teething.

Digestive system: diarrhoea, abdominal cramps caused by teething.

CONTRA-INDICATIONS

Consult a health care practitioner prior to long-term use. Do not take if allergic to Asteraceae or Plantaginaceae.

INTERACTIONS

None known.
