

Feminatop CAPSULE

REPRODUCTIVE SYSTEM
Female tonic

NPN 80047288

85 CAPSULES

283 mg/CAPSULE

Composition				
Blessed Thistle	flower and leaf	<i>Cnicus benedictus</i>	39 mg	Organic
Cramp Bark	bark	<i>Viburnum opulus</i>	39 mg	Organic
False Unicorn	root and rhizome	<i>Chamaelirium luteum</i>	39 mg	Organic
Ginger	rhizome	<i>Zingiber officinale</i>	39 mg	Organic
Uva Ursi	leaf	<i>Arctostaphylos uva-ursi</i>	39 mg	Organic
Red Raspberry	leaf	<i>Rubus idaeus</i>	39 mg	Organic
Yarrow	flower	<i>Achillea millefolium</i>	39 mg	Organic
Cayenne	fruit	<i>Capsicum annum</i>	10 mg	Organic
Vegetable cellulose capsules				

DOSAGE

ADULT:

INTERVENTION: 4 capsules, 2 times per day.

TREATMENT: 3 capsules, 1 to 2 times per day for 6 weeks. Repeat as needed.

ADOLESCENT (14-18 YEARS):

TREATMENT: 2 capsules, 1 to 2 times per day.

DIRECTIONS FOR USE

Take 30 minutes before meals or at bed time, with a little warm water or herbal tea. For long-term treatment, take 6 days out of 7.

MODE OF ACTION

Feminatop compound was conceived to tone and cleanse the organs of the female reproductive system to insure their proper functioning. It reduces congestion, inflammation and stagnation in the reproductive organs by stimulating blood circulation. It is tonic and astringent and tightens the tissues of the mucus membrane and restores muscle tone to the uterus and pelvis, thereby restoring their proper functioning. Women with gynecological conditions such as endometriosis, PCOS, uterine fibroids and prolapsed uterus can benefit from the use of Feminatop, as it regulates those conditions and reduces the symptoms that they cause. Its antiseptic and astringent properties also make it a good compound for recurring vaginitis and bladder infections.

Feminatop helps relieve menstrual cramps, regulates the menstrual cycle, decreases excess menstrual bleeding and promotes fertility.

BLESSED THISTLE: as a tonic and antispasmodic, blessed thistle is very useful for all gynecological troubles, especially when there is congestion of the reproductive organs.

CRAMP BARK: a major antispasmodic herb, cramp bark is very efficient to relieve smooth muscle spasms and menstrual cramps. It calms premenstrual tension, is mildly analgesic and relieves pain of the premenstrual syndrome (migraine, cramps).

FALSE UNICORN: tones and decongests the female reproductive organs and balances hormone levels. False unicorn is used to relieve menstrual troubles, hot flashes at menopause and in the treatment of cysts, fibroids, endometriosis and infertility.

GINGER: stimulates blood circulation and tones the female reproductive system. Ginger is also an emmenagogue, antispasmodic and increases the effects of other herbs in this compound.

RED RASPBERRY: great tonic of the female reproductive system, red raspberry nourishes, fortifies and balances this system. It restores

muscle tone of the uterus and pelvic floor and relieves menstrual cramps. Red raspberry is nourishing and astringent and reduces excess menstrual flow.

UVA URSI: as an astringent, uva ursi tightens the tissues and reduces secretions of the female reproductive system. Its antiseptic qualities help treat infections of this system.

YARROW: as an emmenagogue, yarrow stimulates the uterus and helps start late menses. It promotes hormone balance, regulates menstrual flow and reduces symptoms of the menstrual period and menopause.

CAYENNE: by stimulating local blood circulation, cayenne helps decongest the reproductive system and promotes healing of the tissues. It increases the actions of the other herbs.

HELPFUL ASSOCIATIONS

RED RASPBERRY infusion for all troubles of the female reproductive system.

MENSTRUIX for menstrual pain.

SHEPHERD'S PURSE for excess menstrual bleeding.

CHASTE TREE for hormone imbalance, symptoms of menopause.

GODDESS TEA as a nourishing tonic.

URIMIX for the treatment of bladder infections and vaginitis.

ETHNOBOTANY

Female reproductive system: endometriosis, fibroids, ovarian cysts and PCOS, painful menstruation, irregular or absent period, leukorrhea, ovarian or uterine pain and infection, bladder infection, infection of the cervix, Bartholinitis, recurring vaginitis, hormone imbalance after taking birth-control pills, fertility troubles.

Urinary system: recurring bladder infections.

CONTRA-INDICATIONS

Consult a health-care practitioner if symptoms persist, worsen or if new symptoms appear or before using with prescription drugs, in case of gastric inflammation or ulcer. Do not use during pregnancy or breastfeeding. Do not use if you suffer from a serious disease or if allergic to herbs of the daisy (composite) family.

INTERACTIONS

Do not use if taking products containing diuretics.
